

# TURRA 30 V10

REMOTE CONTROLLED TURRET

EVPU®

TURRA 30 V10 - The latest generation of remotely operated weapon systems, designed for integration with light wheeled, tracked armored, and combat vehicles.

## TURRA 30 V10 introduces a range of cutting-edge innovations:

- Active Protection System – HARPIA
- Multi Canister Drone Launcher – VIPER
- Mini Remote Weapon Station – Gladius TWIN (optional)
- SPIKE LR/LR2 (1 x MLP inside the turret, 2 missiles ready to fire)
- Composite Ballistic Protection – enhanced survivability with advanced materials

## In addition to these innovations, TURRA 30 V10 also features:

- 30 mm main cannon (350 rounds)
- Coaxial 7.62 mm machine gun (600 rounds)
- Smoke grenade launchers (8 pcs., 120° coverage)
- Military automated meteorological sensor
- Tactical situational awareness system
- Independent gunner and commander sights

### Multi Canister Drone Launcher - VIPER

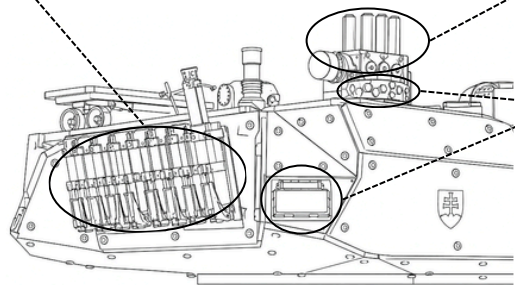

- Multi mission capabilities such as
  - ISR (Intelligence, Surveillance, Reconnaissance)
  - LM (Loitering munition)
  - EW (Electronic Warfare)
  - CUAS (Counter Unmanned Aerial Systems)

### Active Protection System - HARPIA

- Hard-kill solution utilizing AI
- Multi-threat engagement capability
- Autonomous execution of countermeasures
- Neutralization of UAVs and anti-tank guided missiles

### Tactical Situational Awareness

- Multi-Mission Radar
- Anti-tank firing detector
- Sniper & gunshot location system
- Advanced Algorithms & AI capabilities

Hunter-killer capability

Active Protection System HARPIA

Independent gunner and commander sights and controls

Extensive capacity of loaded ammunition

Integrated Tactical Situational Awareness & Targeting System
